**Teaching activity.** I am responsible for the AQFood core course “Aquatic Food Primary Production: Fishery and Aquaculture (7.5 ECTS; UMB)”. In addition I am the local responsible at NMBU for the three other AQFood core courses. I also teach several courses in aquaculture production and engineering in the master program in aquaculture, and in fish processing technology within the master program in Food Science at NMBU.

**Research activity.** My research activity includes topics within aquaculture engineering including water treatment and RAS technology. I have also been involved in a number of projects in salmon slaughtering and processing for the industry, and has been partly financed by industry. I have supervised a great number of students taking their master thesis together with the industry, and have also been in charge of running a fish laboratory at NMBU.

**Developing teaching material.** I have been involved in a number of projects dealing with development of teaching material within my sector as web pages and videos. In addition I have written a number of text books and chapters in text books both national and international.
